

Gold Member Nutrition Supplies Services

About the Company

Nutrition Supplies Services was founded by Dr. Frank Cremin in 1978 to meet the needs of a rapidly expanding added value food sector. The company, which is based in Innishannon, Co. Cork, is the only dedicated high-volume pharma-grade premix manufacturing plant in Ireland. Nutrition Supplies Services is a human nutrition business that specialises in the co-creation, development, and manufacturing of customised nutritional premixes for a wide range of clients, including some of the world’s major infant milk formula, food, beverage, and dairy companies.

Spotlight Target Area: Packaging

Nutrition Supplies Services is committed to responsible sourcing and adopting sustainable business practices. The company demonstrated a strong performance overall throughout 2021, performing particularly well in the target areas of Packaging, Energy, and Community Engagement, subsequently being scored exemplary across all of these areas.

In the target area of Packaging, the company conducted a risk assessment which led to a conclusion that lower gauge plastic wrap was suitable for internal pallet movements without impacting safety or causing damage to materials. As a result, plastic wrapping used per tonne decreased by four grams/kg, with the company already 51% ahead of the original target set.

Membership Tier 4

Minimum Origin Green Targets Required Annually = 5

Exemplary Performance Target Areas

Sustainability Programme
GOLD MEMBER
2022

“We are delighted to be part of Origin Green. Our onsite sustainability strategy is already reducing emissions and costs. We are upskilling the NSS team to help make sustainability part of the Nutrition Supplies & Services way of doing things.”

Frank Cremin, Ph.D. MD
